PROFESSIONAL SUMMARY

Data Analyst with a B.Sc. in Mathematics and a strong foundation in quantitative analysis, business intelligence and data-driven problem solving. Portfolio experience across exploratory data analysis, business and financial performance analysis, KPI reporting, data preparation and visualization. Uses Advanced Excel, SQL, Power BI and Python to explore datasets, identify trends, build analytical views and communicate actionable insights. Completed the Tata iQ GenAI-Powered Data Analytics job simulation through Forage.

CORE TECHNICAL SKILLS

Analytics & Statistics: Exploratory Data Analysis (EDA), statistical analysis, trend analysis, variance analysis, comparative analysis, data profiling

Data Management: SQL, data extraction, data cleaning, data transformation, data validation, structured data preparation

Business Intelligence: Power BI, data modelling, DAX, interactive dashboards, KPI development, data visualization, reporting

Spreadsheet & Programming: Advanced Microsoft Excel, Python, analytical reporting, automation-oriented data workflows

Business Analysis: Financial analysis, business performance analysis, insight generation, data storytelling, decision support

SELECTED PROJECTS

Tata Motors FY23–FY25 Data Analysis | Independent Portfolio Project

- Analysed multi-year company performance data to examine year-over-year movement, performance trends and key financial/business indicators. Structured findings into an analytical workflow and communicated insights through clear reporting and visual summaries. GitHub: github.com/aryan34575-droid/tata-motors-fy23-fy25-data-analysis

Aryan Data Analyst Portfolio | Independent Portfolio Project

- Demonstrates an end-to-end analytics workflow covering dataset exploration, preparation, analysis, KPI interpretation and presentation of data-backed findings. Portfolio: github.com/aryan34575-droid

Tata iQ — GenAI-Powered Data Analytics | Forage Job Simulation | 2 November 2026

- Explored a customer dataset, reviewed data quality and patterns, and considered potential indicators relevant to delinquency risk. Used a GenAI-assisted analytical workflow to summarise findings for business stakeholders. Job simulation, not employment.

EDUCATION

B.Sc. Mathematics | 2024 | 76.71%
Nandini Educational Institute | Gonda, Uttar Pradesh, India

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Ultimate Job-Ready AI-Powered Data Analytics Course — CodeWithHarry | 4 September 2026
- AI Tools & Claude Workshop — Be10x | 29 March 2026
- Course on Computer Concepts (CCC) Certificate
